ANNUAL INDEX

January 15—December 15, 1994

SUBJECT INDEX

A

AIDS
AIDS comes to Main Street, USA. 5/15:6 (N)
Elusive AIDS vaccine. 2/15:23 (L)
Is the workup really worth it? 1/15:20 (L)
Not the last word on early HIV therapy. 5/15:13 (P)
The growing risk of AIDS in older patients. 10/30:61-71
Trying out an oral AIDS vaccine. 6/15:7 (N)

Alternative medicine
Alternative medicine—or quackery? 6/15:80-98
Give users of unorthodox medicine some credit. 11/30:11 (L)
Make no exceptions for unscientific therapies . . . 12/15:16-18 (L)
NIH explores alternatives in earnest. 7/15:7-8 (N)
Unconventional therapies move mainstream. 3/15:7-8 (N)

Antioxidants
Vitamin E: Much ado about what? 9/30:19 (P)

Asthma
Asthma update: Better diagnosis, closer control. 11/30:64-84

C

Cancer
Availability of tumor marker assays. 3/30:14 (L)
Begin palliation when cancer is diagnosed. 6/15:15-16 (L)
Breast cancer surgery: Does timing matter? 10/30:23 (P)
Cancer pain guidelines: Better relief needed. 4/15:6 (N)
Cancer pain: More relief needed. 10/15:17-19 (P)
Cancer screening falls short. 10/15:6 (N)
Cancer: When to focus on palliation. 2/15:123-142
NIH: Selective screening is best for ovarian cancer. 7/15:6-7 (N)
Nonpalpable breast lesions: No complacency. 9/15:16-19 (P)
Ups and downs in cancer rates. 4/15:6-7 (N)
Wanted: More than a few good men. 1/15:10 (N)

Cardiology
ACE inhibitors after MI: Searching for consensus. 11/30:15-16 (P)
All or nothing in MI risk reduction. 4/30:20 (P)
A new way to enhance CPR? 8/15:12-13 (P)
Arrhythmia workup without missing a beat. 4/30:19 (L)
Arrhythmias in the healthy heart. 2/15:145-178
Atrial fibrillation: Common—and ominous. 10/15:96-116
β-Blockade and CHF: Not mutually exclusive. 1/15:20 (L)
β-Blocker therapy: How long is long-term? 1/30:12 (L)
Cardiac rehab: Still a good idea? 10/30:24-40
CHF deaths on the rise. 4/15:7 (N)
Choose the right cardiac imaging. 3/15:15 (L)
Gaining ground on cardiogenic shock. 9/30:24-38
Heading off trouble in unstable angina. 5/30:12-31
Magnesium and nitrates in MI: Back to earth. 4/15:26 (P)
New guidelines for angioplasty. 7/15:37-43 (P)
Racial and ethnic differences in CVD: Managing risk factors. 6/15:51-78
Racial and ethnic differences in CVD: Who's at risk and why. 6/15:28-46
Reducing ischemia may not prolong life. 2/15:23 (L)
Rising to the challenge of acute MI. 7/15:126-152
Technology, not diet, has saved lives. 12/15:16 (L)

Clinical interview case & comment
Can I trust you, Doc? 9/15:120-123
Gone today, hear tomorrow. 4/30:75
I hope I answered your questions all right. 11/30:88
"I'm not talking." 1/30:97
Will he get better? 7/15:156-158

Cross-cultural care
Caring for patients in a multicultural society. 6/15:105-120
Five vignettes of cross-cultural care. 6/15:120-123
The doctor's office is an alien world. 9/30:16 (L)

D

Dermatology
A human bellwether for diver's itch. 12/15:18 (L)
The problems that plague aging skin. 4/15:89-119

Diabetes
Diets for diabetes: More choices than ever. 9/30:86-94
Real-world management of type II diabetes. 9/30:68-86
The sizable cost of treating patients with diabetes. 6/15:6 (N)

Diagnosis
Diagnostic pearls for 10 common problems. 1/15:70-103

Domestic violence
Is the battered woman also the problem? 3/30:14 (L)

Drug complications case & comment
After the fall . . . why'd the BP crash too? 4/15:173-175
First the itch, then the crash. 3/30:76-77
It wasn't her heart that began to swell. 9/15:112-116
On top of everything else, an acute abdomen. 7/15:159-161
We come to bury seizures, not raise them. 3/15:182-183

Drugs
A cost-conscious approach to prescribing. 5/30:55-65
A look at the over-the-counter culture. 6/15:6-7 (N)
Antibiotic allergy: First confirm, then cope. 11/30:21-45
Antidepressant therapy: How much is enough? 4/30:19 (L)
Choosing the right NSAID for joint pain. 12/15:76-108
Desmopressin: How effective for enuresis? 1/15:27 (P)
Do aminoglycosides still have a role? 4/30:63-74
Naproxen goes OTC. 2/15:11 (N)
New macrolides: When worth the cost? 4/15:20 (L)
Reducing drug costs for elderly patients. 10/30:19 (L)
Stay on track with off-label uses. 6/15:98-101
The cephalosporins: When to use, how to choose. 10/30:72-86
The new psychopharmaceuticals. 1/30:47-61
The Rx pad. 1/15:11; 1/30:6; 2/15:11; 3/30:4; 4/30:17; 6/15:7; 9/15:7; 9/30:7; 12/15:15 (N)
The ups and downs of generic substitution. 7/15:33 (L)
The wise use of psychiatric drugs. 11/15:82-117
Where have all the dollars gone? 1/30:7 (N)

E

Editorials
AIDS comes home. 7/15:19

P	Practical Briefings

A strange and frightening landscape. 5/15:17
A vote for hope. 6/15:11
Be good to this patient. 5/30:7
Beyond O.J. 9/30:15
Dare to say the "D" word. 3/15:12
Field of dreams—or nightmares? 1/30:11
Good news. 10/15:14
Inside Pandora's box. 11/15:16-17
Into the triangle. 2/15:19
No, Canada! 3/30:13
Oprah, Joe, and Mary. 10/30:15
Patient education pays off. 4/30:18
Primary care wannabes. 1/15:17
Seasons change. 11/30:10
Send us your cases! 9/15:11
Successful aging for all? 2/28:7-8
The envelope, please . . . 4/15:18-19
When clinical worlds collide . . . or overlap. 8/15:15

Educational material
AF and AD: Reaching out to patients. 12/15:15 (N)
COPD-TV. 1/30:7 (N)
Get the FAX. 7/15:8 (N)
Information, please. 11/30:9 (N)
Reading room. 7/15:8 (N); 10/15:8 (N)

Emergency medicine
Acute care for sexual assault victims. 8/15:112-137
Hook, fin, scuba, skin: Aquatic emergencies. 8/15:70-90
Neck trauma: No margin for error. 8/15:44-66
Uniform protocols for sexual assault victims. 12/15:16 (L)

Ethics
An update on ethics. 9/30:7 (N)
Assisted suicide—and other ethical dilemmas. 3/15:77-92
Ethical dilemmas in emergency medicine. 8/15:138-151
In support of Dr. Kevorkian. 9/15:12 (L)
Primum non nocere: A new look at an old ideal. 1/15:44-66
Treading the line: *Non nocere* and nihilism. 6/15:16 (L)
Wait—an alternative to assisted dying. 5/30:11 (P)
Waiting to die—but for what? 10/30:19 (L)
What is conduct unbecoming? 3/15:95-104
Where does assisted suicide lead us? 7/15:26 (L)

F

Fatigue
The psychosocial side of chronic fatigue. 3/15:15 (L)

Flowcharts
Diagnosing depression. 2/15:42-43
Diagnosing unstable angina. 5/30:20
Emergent and urgent antihypertensive therapy. 9/15:96-97
Guidelines for colposcopy. 3/15:176-177
Initial management of acute diarrhea. 8/15:100-101
Initial management of neck trauma. 8/15:52-53
Initial management of stroke. 8/15:24-25
Managing asthma. 11/30:72-73
Managing atrial fibrillation. 10/15:108
Managing chronic pelvic pain. 3/30:34-35
Managing depression in the elderly. 2/28:90-91
Managing dermatophyte infections. 1/30:28-29
Managing heel pain in runners. 4/15:76-77
Managing hepatitis C. 5/15:114-115
Managing *H. pylori* infection and peptic ulcer. 5/15:26-27
Managing hyposmia. 9/30:50-51
Managing menstrual irregularities. 4/15:158-159
Managing sickle chest syndrome. 4/30:40
Managing type II diabetes. 9/30:80-81
Managing vaginitis. 9/15:42-43
Palliative care for incurable cancer. 2/15:140-141
Treating benign arrhythmias. 2/15:168-169
Treating dry skin in the elderly. 4/15:102
Treating erectile dysfunction. 3/15:46-47
Treating major depressive disorder. 2/15:72-73
Treating skin infections in the elderly. 4/15:106
Treating unstable angina. 5/30:28
Treatment for acute MI. 7/15:142-143
Triage of heart murmurs in children. 4/15:146-147
Workup for unexplained weight loss. 3/30:50-51

G

Gastroenterology
ACP issues guidelines for treating gallstones. 3/30:16-21 (P)
A revolution in peptic ulcer disease. 5/15:19-32
H. pylori in blood and breath. 10/30:19 (L)
H. pylori: Worry about resistance? 7/15:29 (L)
New guidelines on colorectal polyps. 2/15:24-26 (P)
NIH panel recommends new strategy for ulcer therapy. 3/15:6 (N)
Severe vomiting and diarrhea: Initial measures. 8/15:93-109
The case of the blue belly button. 7/15:29 (L)

Gastroenterology case & comment
A diverticular mass—with a difference. 4/15:165-166
Rectal villous tumor: Malignant? Treatable? 4/15:166-172

Genetics
For males with an extra X. 1/30:7 (N)
Genome research and a new era in medicine. 4/15:23 (L)
Human genes: The map takes shape. 1/15:28-43
The blessing—and curse—of genetic testing. 9/15:20-37

Geriatrics
Cardiac interventions in the old old. 2/28:41-62
Do "smartness drugs" boost cognition in the old? 3/15:18 (P)
Geriatric assessment: Focus on function. 2/28:10-32
How many drugs does your aged patient need? 3/30:61-72
Hypothermia steps inside. 2/15:11 (N)
Pay physicians more for nursing home care? 4/15:20-23 (L)
10 clues to caring for the chronically ill. 2/28:65-83
When depression strikes the elderly patient. 2/28:85-102

Gynecology
Colposcopy: When? Why? How? 3/15:167-181
Contraception in the 1990s. 1/15:107-125
Does history alone ever call for colposcopy? 7/15:23 (L)
How effective is natural family planning? 5/30:8-10 (L)
How to help women with chronic pelvic pain. 3/30:22-39
Menstrual irregularities: A focused evaluation. 4/15:155-164
Vaginitis: Diagnosis is the key. 9/15:39-61
When does estrogen deficiency begin? 2/15:23 (L)

H

Health care reform
Health care reform: 1994 or bust. 5/30:4 (N)

Hematology
Brighter horizons for sickle cell disease. 4/30:26-44

Hospitalization costs
The 10 most expensive hospital stays. 5/15:7 (N)

Hypertension
Addressing multiple risks in hypertension therapy. 9/15:64-76
Controlling BP: Following doctor's orders? 9/15:6 (N)
Managing hypertension in patients with diabetes. 1/30:15 (P)
Urgent, emergent—and safe—BP reduction. 9/15:80-111

Hypertension case & comment
A violinist who wants to B sharp. 11/15:151-154
Global heart dysfunction: Does it imply CAD? 1/30:98
Uncontrolled BP and quick gastric emptying. 7/15:162

I

Impotence
Better to live with impotence? 6/15:15 (L)
Impotence: Help for erectile dysfunction. 3/15:22-56

Infectious diseases
A field guide to animal-borne infections. 10/15:23-43
A wrap-up on the 1993-94 flu season. 5/15:7 (N)
Can dermatoses be traced to soil? 6/15:16 (L)
Day-care infections: Children at risk. 5/15:118-133
Emerging infections just keep on emerging. 10/30:11 (N)
Fighting drug resistance. 9/30:16 (L)
Fungal skin infections: Common but stubborn. 1/30:16-44
Garlic: Bad for breath and bacteria. 5/15:6 (N)
Hepatitis C & E: How much of a threat? 5/15:105-117
New threats from foodborne infections. 7/15:47-64
Respiratory pathogens: Something old, something new. 5/15:65-89
RSV—Not just a pediatric concern. 12/15:35-53
STDs in '94: The new CDC guidelines. 4/15:29-53
The hidden costs of treating UTI. 1/30:12 (L)
The partially treated respiratory infection. 9/15:12-13 (L)
Travel infections: The road to good health. 5/15:36-58
When bugs outsmart drugs. 5/15:135-156
When to suspect β-lactamase resistance. 7/15:23 (L)

Infectious disease case & comment
A burning issue. 6/15:154-158
A complicated simple infection. 9/30:99-100
A fate most foul. 8/15:152
Aseptic meningitis from a pyogenic infection? 10/15:117
Eosinophilia in a Cambodian refugee. 3/30:78-82
Fever and tachypnea in New Mexico. 5/15:90-96
Flamboyant blisters around one eye. 1/15:151-152
Give this man a big hand. 5/30:66-71
Hematuria out of Africa. 6/15:158-160
Hepatitis or not? 2/15:179-190
Is it a bird? A plane trip? Superinfection? 10/30:87
Pinkeye and rash in a child. 3/15:184-188
Rain forest furunculosis? 7/15:154-155
Right upper quadrant pain in a diabetic. 7/15:154
Vomiting and diarrhea en route from Jamaica. 5/30:71
What's causing the hyperbilirubinemia? 12/15:127-128
Which pneumonia in this AIDS patient? 9/15:118-119

M

Magnesium
Magnesium: Growing in clinical importance. 1/15:130-150
Magnesium therapy: Coming of age? 1/30:79-94

N

Narcolepsy
Surprise resolution of narcolepsy. 7/15:33 (L)
Neurology
Loss of taste or smell: A rational approach. 9/30:41-64
Neurologic disease: 5 scenarios to manage. 5/30:32-51
Preventing stroke: Who should take warfarin? 12/15:27-31 (P)
Professional standards for neuropsychology. 10/30:19 (L)
Spreading the word on status epilepticus. 1/15:11 (N)
Stroke: Mobilizing against a "brain attack." 8/15:16-43
What you can learn from neuropsychologic testing. 7/15:97-116
Nutrition
How much calcium is enough? 12/15:14-15 (N)
The American diet: Good news? 5/30:4 (N)

O

Obesity
Does body weight influence longevity? 9/15:13 (L)
Obesity in America: Heavy news. 1/15:10-11 (N)
Occupational medicine
Work-related illness: Lung and skin disorders. 10/15:48-73
Work-related illness: Radiation, repetitive motion, and other job hazards. 10/15:77-88

P

Pain
A chronic pain personality? 9/15:12 (L)
Can you feel their pain? 11/30:9
Sclerotherapy works for chronic pain. 11/30:11 (L)
12 steps to managing chronic pain. 7/15:117-125
Patient education
Helping patients adhere to the regimen. 10/30:43-52
More tips for patient adherence. 12/15:16 (L)
Patient information handouts
A guide to successful breastfeeding. 2/15:119-120
Antibiotics for ulcers? 5/15:33
Conditioning for the beginning runner. 7/15:87
Get the lead out of your child's life. 6/15:150-153
Health tips for the traveler. 5/15:61-62
Helping your child eat well. 3/15:136
Home safety checklist. 2/28:37
How to avoid food poisoning. 7/15:66-71
How to keep a yeast infection from coming back. 9/15:62
How to work comfortably at a computer. 10/15:92-95
Learning about anxiety: You're not alone. 11/15:56-59
Living with osteoarthritis. 12/15:120-123
Long-acting contraceptives: New, no-hassle alternatives. 1/15:126-129
Protect yourself against tick bites. 10/15:44
Running for health and fitness: Tips for beginners. 7/15:85
Select a shoe that fits, and wear it. 7/15:88
Stretch before you run. 7/15:86
Taking care of dry skin. 4/15:120
Talking to your doctor. 10/30:57-58
Tips on taking medicines. 3/30:75
Using your metered-dose inhaler. 11/30:87
Vomiting and diarrhea: What to eat during recovery. 8/15:110
What you should know about vasectomy. 12/15:74-75
When your child has croup. 11/30:63
You can help save your own life in a heart attack. 7/15:153
Your asthma control plan. 11/30:85-86
Pediatrics
Clearing the air on croup. 11/30:47-59
Heart murmurs in children: When is a workup needed? 4/15:123-151
Lead testing for everyone? 6/15:127-149
Mother's milk and medication: How safe to mix? 3/15:8
Overcoming obstacles to breastfeeding. 2/15:88-112
Pediatric points. 10/30:11

Substance abuse
Why drug screening belongs in your practice. 4/30:46-61

U

Urology
BPH: Advise and consent. 3/15:7 (N)
New guidelines—and many options—for BPH. 6/15:18-27 (P)
No-scalpel vasectomy: A kinder, gentler approach. 12/15:55-73

W

Weight loss
Pinpointing the cause of unexplained weight loss. 3/30:43-59
Workup for weight loss: Ask the patient first. 7/15:26 (L)

CONSULTANT AND CONTRIBUTOR INDEX

A

Ackerman MD: Impotence: Help for erectile dysfunction. 3/15:22-56
Akiskal HS: The wise use of psychiatric drugs. 11/15:82-117
Alberts MJ: Stroke: Mobilizing against a "brain attack." 8/15:16-43
Alderman M: Addressing multiple risks in hypertension therapy. 9/15:64-76
Allen HD: Heart murmurs in children: When is a workup needed? 4/15:123-151
Altura BM: Magnesium: Growing in clinical importance. 1/15:130-150
Magnesium therapy: Coming of age? 1/30:79-94
Amsterdam EA: Cardiac rehab: Still a good idea? 10/30:24-40
Heading off trouble in unstable angina. 5/30:12-31
Is it normal worry—or pathologic anxiety? 11/15:26-36
Urgent, emergent—and safe—BP reduction. 9/15:80-111
Anderson BJ: Stay on track with off-label uses. 6/15:98-101
Auerbach PS: Hook, fin, scuba, skin: Aquatic emergencies. 8/15:70-90
Auerbach SH: What you can learn from neuropsychologic testing. 7/15:97-116

B

Bailey WC: Asthma update: Better diagnosis, closer control. 11/30:64-84
Bar-On M: Lead testing for everyone? 6/15:127-149
Barsan WG: Stroke: Mobilizing against a "brain attack." 8/15:16-43
Bazzi MN: Flamboyant blisters around one eye. 1/15:151-152 (C)
Beam TR Jr: The cephalosporins: When to use, how to choose. 10/30:72-86
Beck JC: Geriatric assessment: Focus on function. 2/28:10-32
Berdon WE: On top of everything else, an acute abdomen. 7/15:159-161 (C)
Berk SL: Respiratory pathogens: Something old, something new. 5/15:65-89
Besdine RW: Successful aging for all? 2/28:7-8 (E)
Biesecker BB: The blessing—and curse—of genetic testing. 9/15:20-37
Billings PR: The blessing—and curse—of genetic testing. 9/15:20-37
Bohannon R: Self-help aids for minor disabilities. 3/15:141-162
Botash AS: Acute care for sexual assault victims. 8/15:112-137
Bowie WR: STDs in '94: The new CDC guidelines. 4/15:29-53
Bowyer BL: Preventing common runners' injuries. 7/15:72-81
When a beginning runner overdoes it. 4/15:54-86
Braen GR: Acute care for sexual assault victims. 8/15:112-137
Branch WT: *Primum non nocere:* A new look at an old ideal. 1/15:44-66
Brass LM: Stroke: Mobilizing against a "brain attack." 8/15:16-43
Breeling JL: Rain forest furunculosis? 7/15:154-155 (C)
Brodsky MA: Magnesium: Growing in clinical importance. 1/15:130-150
Magnesium therapy: Coming of age? 1/30:79-94
Brown EA: Hepatitis C & E: How much of a threat? 5/15:105-117
Brown H: Alternative medicine—or quackery? 6/15:80-98
Brunton SA: *Primum non nocere:* A new look at an old ideal. 1/15:44-66
Buchwald D: Caring for patients in a multicultural society. 6/15:105-120
Burford SF: When clinical worlds collide . . . or overlap. 8/15:15
Burnett JW: Hook, fin, scuba, skin: Aquatic emergencies. 8/15:70-90

C

Cadieux RJ: Cardiac rehab: Still a good idea? 10/30:24-40
Cantrill SV: Neck trauma: No margin for error. 8/15:44-66
Cantu RC: Neck trauma: No margin for error. 8/15:44-66
Caplan AL: The blessing—and curse—of genetic testing. 9/15:20-37
Caralis PV: Caring for patients in a multicultural society. 6/15:105-120
Carr DB: Cancer: When to focus on palliation. 2/15:123-142
Carter C: Is it normal worry—or pathologic anxiety? 11/15:26-36
Treating anxiety: A collaborative approach. 11/15:36-52
Caskey CT: Human genes: The map takes shape. 1/15:28-43
The blessing—and curse—of genetic testing. 9/15:20-37
Cassileth BR: Alternative medicine—or quackery? 6/15:80-98
Castro OL: Brighter horizons for sickle cell disease. 4/30:26-44
Cerda JJ: A revolution in peptic ulcer disease. 5/15:19-32
Chatterjee K: Heading off trouble in unstable angina. 5/30:12-31
Gaining ground on cardiogenic shock. 9/30:24-38
Rising to the challenge of acute MI. 7/15:126-152
Chicoye LS: Brighter horizons for sickle cell disease. 4/30:26-44
Chisolm JJ Jr: Lead testing for everyone? 6/15:127-149
Chung F: Asthma update: Better diagnosis, closer control. 11/30:64-84
Church DL: Which pneumonia in this AIDS patient? 9/15:118-119 (C)
Cicerone KD: What you can learn from neuropsychologic testing. 7/15:97-116
Cluff LE: Cardiac interventions in the old old. 2/28:41-62
Cochran JW: Neurologic disease: 5 scenarios to manage. 5/30:32-51
Cohen M: When bugs outsmart drugs. 5/15:135-156
Cohen MB: Severe vomiting and diarrhea: Initial measures. 8/15:93-109
Collins FS: Human genes: The map takes shape. 1/15:28-43
Curry SL: Colposcopy: When? Why? How? 3/15:167-181

D

Davidson MB: Real-world management of type II diabetes. 9/30:68-86
DeBusk RF: Cardiac rehab: Still a good idea? 10/30:24-40
Deutchman ME: Vaginitis: Diagnosis is the key. 9/15:39-61
Dickey NW: Assisted suicide—and other ethical dilemmas. 3/15:77-92
What is conduct unbecoming? 3/15:95-104
Dillard ML: We come to bury seizures, not raise them. 3/15:182-183 (C)
DiNubile MJ: When bugs outsmart drugs. 5/15:135-156
Driscoll CE: *Primum non nocere:* A new look at an old ideal. 1/15:44-66
Dudley MN: When bugs outsmart drugs. 5/15:135-156

E

Eaglstein WH: The problems that plague aging skin. 4/15:89-119
Elin RJ: Magnesium: Growing in clinical importance. 1/15:130-150
Magnesium therapy: Coming of age? 1/30:79-94
Elliott WJ: Addressing multiple risks in hypertension therapy. 9/15:64-76
A violinist who wants to B sharp. 11/15:151-154 (C)
Uncontrolled BP and quick gastric emptying. 7/15:162 (C)
Emanuel LL: Ethical dilemmas in emergency medicine. 8/15:138-151
Evans WJ: Loss of taste or smell: A rational approach. 9/30:41-64

F

Fauman BJ: The psychiatric emergency: Heading off trouble. 11/15:130-147
Faye EE: Help people with disabilities to help themselves. 1/30:65-78
Fazio VW: Rectal villous tumor: Malignant? Treatable? 4/15:166-172 (C)
Feldman MD: The growing risk of AIDS in older patients. 10/30:61-71
Feldman RD: The cephalosporins: When to use, how to choose. 10/30:72-86
Felmar EA: Do aminoglycosides still have a role? 4/30:63-74
Fernandez-Del Castillo C: A diverticular mass—with a difference. 4/15:165-166 (C)
Fillit H: The growing risk of AIDS in older patients. 10/30:61-71
Fink RM: We come to bury seizures, not raise them. 3/15:182-183 (C)
Fischer DS: Cancer: When to focus on palliation. 2/15:123-142
Fowler GC: How to help women with chronic pelvic pain. 3/30:22-39
Menstrual irregularities: A focused evaluation. 4/15:155-164
Francis CK: Racial and ethnic differences in CVD: Managing risk factors. 6/15:51-78
Racial and ethnic differences in CVD: Who's at risk and why. 6/15:28-46

Frank DA: What to do when a child won't grow. 3/15:107-135
Fred HL: Diagnostic pearls for 10 common problems. 1/15:70-103
Freedman ML: Geriatric assessment: Focus on function. 2/28:10-32
Friedman-Jimenez G: Work-related illness: Lung and skin disorders. 10/15:48-73
Work-related illness: Radiation, repetitive motion, and other job hazards. 10/15:77-88
Friesen J: Diets for diabetes: More choices than ever. 9/30:86-94

G

Galli R: Hook, fin, scuba, skin: Aquatic emergencies. 8/15:70-90
Gambert SR: How many drugs does your aged patient need? 3/30:61-72
Gany F: Caring for patients in a multicultural society. 6/15:105-120
Garrell M: 10 clues to caring for the chronically ill. 2/28:65-83
Garrison MW: Do aminoglycosides still have a role? 4/30:63-74
Gilchrist VJ: Acute care for sexual assault victims. 8/15:112-137
Go MF: A revolution in peptic ulcer disease. 5/15:19-32
Goade D: Fever and tachypnea in New Mexico. 5/15:90-96 (C)
Golden WE: Depression: A treatable medical condition. 2/15:65-87
Depression: Serious, prevalent, detectable. 2/15:30-63
Goldstein M: No-scalpel vasectomy: A kinder, gentler approach. 12/15:55-73
Golinko RJ: Heart murmurs in children: When is a workup needed? 4/15:123-151
Gomes JA: Atrial fibrillation: Common—and ominous. 10/15:96-116
Gottlieb SO: Cardiac interventions in the old old. 2/28:41-62
Greenberg J: Brighter horizons for sickle cell disease. 4/30:26-44
Grodzicki T: Global heart dysfunction: Does it imply CAD? 1/30:98 (C)
Grossberg GT: How many drugs does your aged patient need? 3/30:61-72
Gubler DJ: A field guide to animal-borne infections. 10/15:23-43
Gums JG: Magnesium: Growing in clinical importance. 1/15:130-150
Magnesium therapy: Coming of age? 1/30:79-94

H

Haft J: Gaining ground on cardiogenic shock. 9/30:24-38
Heading off trouble in unstable angina. 5/30:12-31
Rising to the challenge of acute MI. 7/15:126-152

Magnesium therapy: Coming of age? 1/30:79-94
Segreti J: Respiratory pathogens: Something old, something new. 5/15:65-89

CHANGE THE WORLD ONE FAIRY TALE AT A TIME.

A four-year-old is full of hope. That's one of the reasons there's Head Start. We give low-income preschool children what other children already have. The chance to learn. To be healthy. To be happy.

It's a big job and we need volunteers. Especially skilled professionals like you who want to make a difference in the life of a child. Come share your special talents and interests with Head Start. Because if you change the world of a child, you change the world.

Call 1-800-27-START for a brochure on volunteer opportunities with Head Start.
